

dear fcc,
please don't take away the xm instant traffic and weather that i find so
valuable for my 60 mile daily commute into los angeles. i'm paying for the
service, and there is no reason for you to kowtow to the national association of
broadcasters, who wish to monopolize my radio.

please reject the nab's petition 04-160.

please continue to support xm radio's ability to provide the kind of programming
that i want and that i pay for willingly.

james steven parker
